IN A CLASS OF ITS OWN

In order to provide customised logistical solutions you need a Transport Management System that is flexible to each client's demands, whilst maintaining the system disciplines and business processes necessary to handle high transactional volumes.

**BY CONSTANT MEASUREMENT
AND CONTINUOUS IMPROVEMENT
WE CAN GO FASTER!**

technology

Fast+ Furious have developed our own Information System. It supports our best business practices approach to logistics and we have created a system that is uniquely flexible whilst still maintaining the necessary disciplines and controls.

We utilise Freightware, a robust Transport Management System (TMS). This TMS is an enterprise-level system utilising the Progress database and handles the basic core functions of induction, scanning, POD imaging and Mobile integration. It provides integrity and an honest reflection on distribution data.

We have created our own Business Intelligence Solution and several other proprietary modules, that give us the flexibility to cater for unique customer integrations. Our systems communicate with our clients' IT systems via handheld terminals to allow sign-on-screen capability and live confirmations.

We use SAP Business One for our financial requirements. Simply put, our systems are far more flexible and responsive to any changes the customer may request – hence, we create the system that best mimics our clients' business processes.

THE DRIVE TO WIN!

evolution

Fast+Furious is a rapidly growing company that operates in several niche markets. We constantly evolve to do things differently and this is an integral part of our company's make up.

We are different due to our unique model and the way we approach a customer's needs. We do not try to fit your requirements into our model but attempt to create the best solution for the customer.

The company is evolving and investing into our infrastructure to support our sustainable growth plans which include custom built facilities, new technology, the best people, new vehicles and new processes.

We cannot be all things to all people without compromising somewhere – and Fast+Furious is acutely aware of remaining a focussed and specialised transport solutions company. We do not want to be the biggest, but we do want to be the best at what we do.

This is what we refer as the drive to win and our culture sets us apart from the traditional players.
